DATE OF INFORMATION 50X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1

Organization of Various Units

1. [redacted] units [redacted] 50X1  
[redacted] summarized in the attached charts. 50X1  
[See Enclosures, A-F.] 50X1

Weapons and Equipment

2. In addition to the information which appears in the charts [redacted] 50X1  
[redacted] 50X1
- (a) The 932nd and the 935th Sep AAA Bns each had 23 three-ton Studebaker trucks: 18 were used as prime movers, one for administration, one for the Headquarters Company, one for ordnance repair, one for staff transportation and one for hauling POL supplies. The passenger car, a Mercedes or an Opel, was used by the battalion commander.
- (b) All the weapons [redacted] can be found in reference guides and manuals of the Soviet Army. 50X1

SECRET

50X1

SECRET/SECURITY INFORMATION

-2-

- (c) A new aiming device, mounted on 37-mm guns, has been brought from the USSR to one unit in Germany. It is called the AZP-47 (Avtomaticheskaya Zenitnaya Pritsel - Automatic AAA sight, model 1947). The operator can make slight corrections by observing the shellbursts, and the controls are such as to permit more expeditious handling than in previous devices. For these reasons the new sight is far better than the PUAZO-3 (Pribor Upravleneya Artileriskym Ognyom - AAA director) or the AZP-39 (Avtomaticheskaya Zenitnaya Pritsel - automatic AAA sight, model 1939).

50X1

50X1

50X1

At present the only unit in Germany which has this new sight, previously used in the USSR, is an unknown regiment of the 31st AAA Div, located the year around at Weimar.

- (d) In November 1951 Capt Karpovich who came from the USSR

50X1

told about the following developments:

50X1

50X1

- (1) A new standard cartridge (7.62 mm) for the TT pistol, the carbine and the SMG has been developed and issued to the units.

- (2) A new carbine clip which holds 10 instead of five rounds has been perfected.

- (3) The TT magazine has been changed to hold 10 rounds instead of eight.

50X1

- (4) The Mossin-Nagant carbine, model 1938, has been modified and is now easier to dismantle.

- (e) a new 57-mm AAA gun for use against jet fighters,

50X1

- (f) The frontal armor of the JS-series is about 20 cm /eight inches/ thick and that of the T-34 is about five cm /two inches/.

50X1

AT Weapons

3. Soviet anti-tank weapons:

- (a) The 37-mm, 76-mm, 85-mm field, and the 85-mm AA guns are also used as AT weapons.

50X1

50X1

50X1

- (b) Infantry AT weapons are towed by three-ton ZIS or Studebaker trucks.

- (c) Soviet AT weapons are fairly accurate. Their most effective range is between 200 and 300 meters. At 200 meters any Soviet AT gun can penetrate 20 cm /eight inches/ of armor

SECRET/SECURITY INFORMATION

SECRET/SECURITY INFORMATION

-3-

with a direct hit. For other distances the armor penetration with direct hits is as follows:

37-mm gun      5 cm [two inches]      at 800 meters

57-mm gun      5 cm      at 1 km

85-mm gun      20 cm [eight inches]      at 1 km

- (d) Since 1945 no bazookas, Panzerfausts or short and intermediate range AT weapons have been used because they did not prove effective in World War II. [redacted] the Degtyarev and Simonov 14.5-mm AT rifles are obsolete. [redacted] saw no AT mines but [redacted] believe that the Soviets have some.

- (e) In defense, Soviet AT guns are always emplaced on the flanks of front-line infantry companies.

- (f) [redacted] mortar fire is inaccurate but have had no experience with it.

#### Small Arms and Ammunition

4. [redacted]

50X1

- (a) All small arms and the ammunition for them are in good condition and serviceable. Malfunctions and short rounds occur very rarely. [redacted]

50X1

- (b) [redacted] sniper rifles are very effective but [redacted] know whether the scope on this rifle will maintain its zero.

50X1

- (c) [redacted] the average Soviet soldier [redacted] is not sufficiently trained in marksmanship.

50X1

- (d) Since artillerymen have no bayonets they are given bayonet drill only in basic training. [redacted]

50X1

- (e) The only semi-automatic rifle [redacted] is the Tokarev 40. Since the war, the PPSH, model 1951, 7.62 mm, [redacted] See Tokarev 1940. The semi-automatic carbine in use at present is the Mossin-Nagant, model 1938.

50X1

- (f) [redacted] no information about API (armor-piercing incendiary) ammunition.

50X1

5. Firing techniques depend largely on circumstances. There is no set technique for engaging wide, deep and oblique targets with ground MG fire. The MG company commander must decide how to place his machine guns on each separate occasion. Indirect fire from MG is employed very little since direct fire at pinpointed visible targets is very much preferred. Partial defilade and defilade are used when conditions require it. When the visibility is poor the Soviets use blanketing fire for terrorizing effect. The employment of MGs on final protective lines also depends on the company commander.

SECRET/SECURITY INFORMATION

SECRET/SECURITY INFORMATION

-4-

6.

- 50X1 (a) [redacted] the Soviet soldier in World War II  
 50X1 carried a load of 32 kg, including the gas mask, rations,  
 50X1 knapsack and carbine (60 rounds) or SMG (142 rounds). In  
 combat most soldiers threw away their gas masks and  
 knapsacks.
- (b) Supporting light artillery moves directly with Soviet  
 infantry or some 100 meters behind. Heavy artillery remains  
 one to five km behind the infantry lines.
- (c) Special equipment issued to soldiers in cold weather  
 operations include a sheepskin coat (shuba), felt boots  
 (valenki), fur gloves and a fur cap.
- 50X1 (d) To prevent mass trench foot in winter warfare, a special  
 50X1 yellow-colored fat is issued to the troops. [redacted]
- (e) During the war the Soviet Army used two-seater liaison and  
 observation aircraft (U-2), armed with a 7.62 mm MG as organic  
 50X1 aviation. At present the Soviets have nothing similar to  
 50X1 US organic army aviation. [redacted]

Unit Supply and Maintenance

7. The issue of clothing and equipment for officers and enlisted  
 men was as follows:

## (a) Issue for Officers:

- 1 overcoat - for three years
- 1 cap - for one year
- 1 garrison cap - for three years
- 1 winter uniform (coat and trousers) - for one year
- 1 summer uniform (coat and trousers) - for one year
- 1 set of winter underclothing - for six months
- 1 set of summer underclothing - for six months
- 2 pr shoes (one cowhide, one kid) - each for eight months
- 2 pr footwraps - for one year
- 1 pr socks - for one year
- Sam Browne belt and map case - for four years
- 1 pr shoulderboards - one issue only
- 1 TT pistol - one issue only
- 1 pr binoculars - one issue only
- 1 compass - one issue only
- 1 curvometer - one issue only
- 1 gas mask - one issue only

Officers are not required to turn in clothing when getting  
 a new issue, but EM must do so.

SECRET/SECURITY INFORMATION

SECRET/SECURITY INFORMATION

-5-

(b) Issue for EM:

50X1

- 1 overcoat - for two years
- 1 summer cap - for one year
- 1 winter cap - for one year
- 1 pr boots - for eight months
- 2 uniforms (shirt and trousers) - for one year
- 1 set of summer underclothing - for one year
- 1 set of winter underclothing - for one year
- 2 pr footwraps - for one year
- 1 pr gloves - for one year
- 2 belts (one for blouse, one for trousers) - for three years

Plus company issue:

- 1 pr binoculars to NCO weapon commanders
- 1 SMG, carbine, or TT pistol
- 1 gas mask

8. Food rations for officers and enlisted men are essentially the same except that officers get butter for breakfast and stewed fruit for dinner in addition. The ordinary menu was: soup or broth with meat, and tea with sugar for breakfast; borsch or meat soup, one potato or broth with meat for dinner and mashed potatoes or broth with meat, and tea with sugar for supper. Both officers and EM get 800 grams of bread per day in winter and 700 grams in summer.

9. Clothing is inspected daily by the platoon leader and at irregular intervals by the battery commander. Weapons are inspected daily by the platoon leaders and the battery commander. The maintenance of artillery pieces and small arms was excellent. The battalion had a sufficient supply of common spare parts. When a gun could not be repaired at battalion level, it was exchanged at the army artillery depot.

10. The units of fire and the units of fill known to me were as follows:

200 rounds for each 37-mm AA gun

16 rounds for each TT pistol

100 rounds for each carbine

142 rounds for each SMG

150 kg of gas for a 3-ton Studebaker prime mover

11. During the war a division drew its supplies from army, by-passing corps, and supplied its regiments and separate battalions; army drew supplies from army group. At present, supplies from army to division are shipped by train every three to five days, and division sends supplies to its subordinate units by truck every two or three days at the request of unit supply officers.

50X1

50X1

50X1

SECRET/SECURITY INFORMATION

SECRET/SECURITY INFORMATION

50X1

-6-

12. The food level at division is maintained at a five-day reserve, and at regimental and lower levels at a three-day reserve. The POL reserve for division or lesser units is maintained at two fills per vehicle. The ammunition reserve at division is three units of fire; at regimental and lower levels two units of fire. In the field, supply points and repair units always move with their parent units by organic transportation.
13. In [ ] the 932nd Sep AAA Bn, all prime movers and 37-mm AA guns were stored on blocks in battalion area sheds during summer and winter, except when the unit was on range firing exercises or on maneuvers. Ammunition and small arms were also stored when not needed. [ ]
- (a) The vehicles and guns of the unit within ten minutes
- (b) The Sep AAA Bn would be on the move within 30 minutes
- (c) The rifle division would be on the move within two hours

General

14. [ ] points of general interest:
- (a) Present AA units in the Soviet Zone of Germany have no searchlight companies. Such companies, organized during the war, were deactivated after 1945.
- (b) The 89th Signal Battalion, 57th Gds Rifle Div, was equipped with some teletype machines [ ]
- (c) In the Soviet Zone of Germany Soviet army units have their own telephone lines and do not use German lines. The MGB, however, and the Kommandaturas use the German telephone lines. Communications at army level are conducted by telephone, teletype and radio; at corps and lower levels, communications are conducted by telephone and radio.
- (d) Cavalry units still exist in the USSR but in the Soviet Zone no horses or dogs are used by Soviet troops.
- (e) [ ] weapons in the Soviet Zone of Germany:

12.7-mm AAA MGs

37-mm AA and AT guns

57-mm AT guns

76-mm and 100-mm field pieces (also used as AT guns)

85-mm AT and AAA guns

152-mm field pieces

122-mm regimental howitzers

SECRET/SECURITY INFORMATION

SECRET/SECURITY INFORMATION

-7-

50X1

152-mm divisional and regimental howitzers

SU-100s and SU-152s

- (f) Until 1947 the Soviet Army had tank corps but these were reorganized as tank divisions and the tank brigades were reorganized as tank regiments. At present the tank division contains the following units:

Two medium tank regiments

One heavy tank regiment

One motorized rifle regiment

One howitzer regiment

One AAA regiment

One AT battalion

One engineer battalion

One motorcycle battalion

One signal battalion

One medical battalion

50X1

Service units

15. [ ] two orders issued in 1951 by the Ministry of Armed Forces in Moscow:

- (a) In June 1951 the T/E of Sep AAA Bns (of rifle divisions only) was increased from four to six 37-mm guns per battery. At the same time the T/O of Sep AAA Bns was increased by two NCO's and 16 privates (from five officers, 15 NCO's and 31 privates to five officers, 17 NCO's and 47 privates.) The two extra 37-mm AAA guns were added to the batteries a short time after the publication of the order, but the T/O was increased only gradually as new arrivals joined the units. No new housing or barracks were necessary for the increased personnel as the existing facilities were adequate. The new order did not affect howitzer, mortar, or artillery batteries which still have four guns per unit. [ ]

50X1

50X1

- (b) [ ] an order issued by the same ministry in October 1951 to the effect that each AAA Bn (of rifle divisions only) was to activate an AAA MG company with a T/O of 60 officers and EM and a T/E of 16 Degtyarev 12.7-mm AA MGs. The activation had not yet taken place at the beginning of December 1951. The 12.7-mm AA MG is standard equipment in the Soviet Zone of Germany, and [ ] has not been modified.

50X1

50X1

50X1

50X1

SECRET, [ ]

SECRET/SECURITY INFORMATION

-8-

16. [redacted] information on weapons and their development;

50X1 (a) [redacted] 100-mm and 105-mm AA guns  
are located only in the USSR and there are none of them in  
50X1 the Soviet Zone of Germany.

50X1 (b) [redacted] there was no radar fire control equip-  
50X1 ment in the Soviet Zone of Germany. [redacted]

50X1 (c) New developments in weapons and new weapons in production  
are kept in the USSR for security reasons. In the event of  
hostilities, all new weapons would be brought to the front  
immediately and necessary personnel for their operation  
would be trained within a short time.

## SECRET SECURITY INFORMATION

Legend Encls to A and B, T/O & E of a Separate AAA BnLegend:1. Gun Crew

The basic unit, the gun crew, consists of two NCOs, and seven privates, or one NCO and eight privates, as follows:

<u>Duty</u>	<u>Weapon</u>
NCO crew chief	PPSh, or TT pistol
NCO gunner (navodchik), also asst crew chief	PPSh SMG or TT pistol
Aimer (Pritselnyi)	carbine
2d aimer	carbine
Loader (Zaryazhayuchii)	carbine
Two ammunition bearers	carbines
Driver	carbine
Range finder (Dalnomerchik)	carbine

The weapon for this crew is the 37-mm AA gun with the ZD (Zenitnyi Dalnomer) rangefinder. Both are shown in figure 30, IX-22, TM 30-430. The total of other equipment is as follows:

- 3 shovels
- 2 pickaxes
- 2 crowbars
- 3 axes
- 1 3-ton Studebaker prime mover
- 1 (or 2) TT pistols
- 1 (or 2) PPSh SMGs
- 7 (or 8) carbines (no bayonets or knives for artillerymen)

2. Platoon

The platoon contains two gun crews and a platoon leader (lieutenant, sometimes a captain), who is armed with a TT pistol. Thus the T/O is one officer, four NCOs, 14 privates; arms for these are three TT pistols, two PPSh SMGs and 14 carbines.

3. Battery

	<u>Duty</u>	<u>Rank</u>	<u>Weapon</u>
Headquarters	CO	Capt or Maj	TT pistol
	Political officer	Lt	" "
	1st Sgt	M/Sgt	" "
	Medic-instructor	Sgt	No weapon

SECRET SECURITY INFORMATION

Legend to Enclosures C and D  
T/O & E of 57th (or 39th) Gds Rifle Div

Legend

50X1

50X1

[redacted] the rifle division has no divisional artillery or ordnance repair shops, since those repair units are at regimental or separate battalion level.

The organization of the 57th (and 39th) Gds Rifle Div was as follows:

I. Command Element:

CO-Genmajor (Brig Gen) or Col

Executive officer - Col or Lt Col

Tank officer - Col or Lt Col

Political officer - Col or Lt Col

Artillery officer - Col or Lt Col

Chief of Rear Services - Col or Lt Col

Subordinated to the Chief of Rear Services, and counted on his staff, are the following:

Finance officers - one Lt Col or Maj, one Capt, one Lt

Bank officer - Capt

OVS (food & fodder) Section - Maj or Capt, one NCO, one Pvt

EFS (clothing & equipment) Section - Maj or Capt, one NCO, one Pvt

Auditing officer - Capt

EX officer - Maj

PAKH (bakery) officer - Maj and 10 EM

KECH (billeting) officer - Maj, M/Sgt, clerks, typists and some German civilian employees

Subordinated to the Artillery officer, and counted on his staff, are the following:

Artillery C of S (not Div C of S) - Lt Col or Maj

Deputy Artillery C of S (also Div Arty Sig Off) - Lt Col or Maj and one NCO

Reconnaissance officer - Maj or Capt, two EM

Plans and Operations officer - one Maj, one Capt, one NCO, one Pvt

**IV. Howitzer Artillery Regiment**

Contains 36 howitzers of 122-mm and 152-mm caliber

Regiment has three battalions of three batteries each, and each battery has two platoons which consist of two squads (gun crews) each. Platoon has two howitzers, battery four, battalion 12, and regiment 36.

**V. Artillery Regiment**

Contains 36 guns of 76-mm and 122-mm caliber

Regiment has three battalions of three batteries each, and each battery has two platoons which consist of two squads (gun crews) each. Platoon has two guns, battery four, battalion 12, and regiment 36.

**VI. BT-SP Regiment**

Consists of a Headquarters (T/O unknown), two battalions of T-34/85 tanks, one battalion of JS/122 tanks, and a battalion of SU-100 and SU-152 guns.

Each tank battalion contains about 350 officers and EM and 71 tanks. The battalion is composed of three tank companies, each of 110 officers and EM and seven tanks; and a headquarters company of eight tanks. The tank company has three platoons, each of 35 officers and EM and seven tanks.

Each tank has a crew of five as follows:

Tank commander - Officer on JS/122; NCO on T-34/85

Weapons NCO

Loader

Radioman-gunner

Driver

The SU battalion (called Division in Russian) has a T/O of about 80 officers & EM and a T/E of 16 SP guns.

**VII. Sep AAA Bn**

Detailed T/O & E given in annexes 1 and 2 of this report.

**VIII. AT Bn - T/O not known**

Contains three batteries, each of two platoons, which have two squads (gun crews) each. Has a total of twelve 57-mm and 76-mm guns;

**IX. Signal Bn - T/O about 250 Off & EM**

Contains a headquarters, a radio company, a wire-laying company, and a training company.

Exact T/E unknown but it includes REM radio receiver-transmitter stations, TAI-43 field telephones, telephone switchboards, and telephone wire.

**X. Engineer Bn - T/O about 250 Off & EM**

SECRET SECURITY INFORMATION

ENCLOSURE (D)  
Page -7-

SECRET SECURITY INFORMATION

Contains a ponton company, a bridge building company, and a transport company; the transport company has Studebaker trucks (number unknown) and services both the ponton and bridging companies.

50X1

The T/E of the engineer battalion seen by source is shown in (figure 6, page 7 - 20 man boats; MDEA-3, page 23; bridging equipment, figures 25 and 27; also GMC amphibious trucks). No further T/O details.

XI. Motorcycle (Reconnaissance) Bn - T/O about 250 Off & EM

Contains one armored personnel carrier company, one motorcycle company, and one company of BA-64 armored scout cars. No further T/O details.

XII. Chemical Platoon - T/O about 15 Off & EM (Lt, 3-5 NCOs, 10 Pts)

Has three ZIS decontamination trucks, smoke pots, protective clothing, dissemination devices.

XIII. Mobile Repair Shop - T/O about 15 Off & EM

Has three Studebaker repair trucks.

XIV. Drivers School

Usually contained about 100 EM of various units of the division who were learning to drive ZIS and Studebaker trucks.

XV. Headquarters Company

T/O and E unknown; contained three platoons of 10 men each (generally used for guard duty).

XVI. Medical Battalion
